

**Amendments to the Specification:**

Please replace the paragraph beginning on page 1 line 6 with the following rewritten paragraph:

--This is a 111A application of expired Provisional Application Serial No. 60/314,135 [\_\_\_\_\_ Attorney Docket No. 83304 Express Mail EL486846975US] filed August 22, 2001, titled SYSTEM, METHOD AND SOFTWARE PRODUCT FOR ALLOWING A CONSUMER TO ORDER IMAGE PRODUCTS OVER A COMMUNICATION NETWORK FROM A PLURALITY OF DIFFERENT PROVIDERS; Inventors Lou Chavin, Howard E. Bussey, Christopher M. Dobbs and Dale F. McIntyre.--

Please replace the paragraph beginning on page 10 line 7 with the following rewritten paragraph:

--Block 56 represents a unique service available within system 10 and is known as a locator service or simply a locator. The locator functions to provide and receive criteria from users and/or member providers. The criteria is then formed into filters that can be applied to the services directory database of block 54. Block 54 returns a list of member providers to the locator of block 56 matching the provided criteria. An example of a criterion provided by the locator is the physical proximity of the member provider to the service requestor. It should be understood that the criteria may comprise a list of various desired criterion. In addition, the service manager 12 may set predetermined sets of various criteria/criterion that can simply selection of a particular provider. This allows the system 10 to offer well know feature that are market to broad consumer base, for example, a branded feature, such as KODAK COLORWATCH SYSTEM [Kodak's Color Watch™ system] for producing prints.--
